

Web/Drupal Developer

Jackson River is seeking an experienced Web/Drupal Developer to join our dynamic, growing technology team, working on: Drupal Implementations, Drupal module development, and/or Drupal themeing. This position is ideal for a mid to senior level developer with strong Drupal module development, experience working with Web Services(SOAP, APIs, etc), and solid HTML/CSS skills.

About Jackson River

Jackson River is a rapidly growing, profitable, virtual company that works with select influential non-profit organizations. The Web/Drupal Developer position is an integral part of the Jackson River team, involved in multiple ongoing projects and initiatives. More info about Jackson River can be found at www.jacksonriver.com.

Key Responsibilities

- Lead the planning, development, and implementation of Drupal based CMS sites from start to finish
- Develop custom Drupal modules as necessary
- Work with other members of the Jackson River team on systems integration and CRM implementations (CiviCRM, Salesforce, Etc)
- Code integrations working with SOAP and system APIs
- Produce standards compliant Drupal Themes from PSD and style guides

Key Skills/Requirements

- Superior Drupal skills; thorough knowledge of custom module development, Drupal Core and Hooks, and experience evaluating and implementing contributed modules
- 3+ years professional PHP experience
- Experience working with Web Services, APIs, etc
- Excellent HTML, JavaScript, JSON/AJAX, and CSS skills
- Ability to create themes from scratch based on PSDs
- Database optimization, experience with MySQL, SQL Server, or other database systems
- Experience implementing large, scalable websites on multi-tiered architectures
- Excellent organization and communication skills
- Detail oriented, excellent follow through
